BONAFIDE CERTIFICATE

This is to certify that the industrial training on Web Development ,work entitled “BUILD YOUR OWN STATIC WEBSITE” which is a bonafide work carried out by Arasada Sai Anusha bearing Register No 320126510133 respectively in fulfillment of Summer Internship Training in III/IV B.Tech, 2nd semester in Computer Science Engineering of the Andhra University, Visakhapatnam during the year 2020-2024 . It is certified that all corrections indicated for internal assessment have been incorporated to account.

Head of the Department
Computer Science and Engineering
ANITS

COURSE COMPLETION CERTIFICATE

CERTIFICATE OF ACHIEVEMENT

Congratulations,

Arasada Sai Anusha

On Successfully completing the course,

BUILD YOUR OWN STATIC WEBSITE

We appreciate your commitment and consistency in learning. With this, you have sharpened your skills and became more in-demand for the Tech Industry.

Issue Date: Apr 14, 2023

ACKNOWLEDGMENT

An endeavor over a long period can be successful with the advice and support of many well-wishers. We take this opportunity to express our gratitude and appreciation to all of them.

We owe our tributes to the Head of the Department, Computer Science & Engineering, ANITS, for his valuable support and guidance during the period of project implementation.

We express our warm and sincere thanks for the encouragement, untiring guidance and the confidence they had shown in us. We are immensely indebted for their valuable guidance throughout our project.

We also thank all the staff members of the CSE department for their valuable advice. We also thank the Supporting staff for providing resources as and when required.

A.Sai Anusha

INTRODUCTION TO STATIC WEBSITE

What is a static website?

Static web pages are made of “fixed code,” and unless the site developer makes changes, nothing will change on the page. Think of it like a brochure for a business. Static sites give a lot of the same type of information that you could get from a brochure, but it can’t just change itself. In order to do this, someone has to create a new page. That’s why static websites are sometimes referred to as brochure sites.

Nothing is stored but the actual pages of a static site. There are:

- No users
- No comments
- No blog posts
- No interactivity

When is a static website built?

A static website is delivered to a user exactly the way it’s stored. That means that nothing on the page will change by the user or even the site administrator unless there’s a redesign of the site, or the site administrator goes directly into the code to change it.

A static site is the most basic kind of website, and the easiest to create. It requires no server-side (also called back-end) processing, only client-side. Client-side technologies are **HTML, CSS, and JavaScript**.

2.1 BOOK STORE PAGE USING HTML AND CSS

Introduction

In this project, we have created a static website for a virtual book store, featuring three popular books: "Wings of Fire," "3 Mistakes of My Life," and "Harry Potter." The primary goal of the website is to provide users with an interactive and engaging platform to explore detailed information about each book.

This website is designed to be user-friendly, with a clean and intuitive interface. Users can navigate through the bookstore, and by clicking on each book, they are directed to a dedicated page containing comprehensive details about that particular book.

The website incorporates HTML for structuring the content, CSS for styling, and additional scripting will be implemented to enable the dynamic behavior when users interact with the books. Through this project, I aim to offer a seamless and enjoyable experience for users interested in learning more about these literary works.

Key Features:

1. Book Selection:

The website presents a curated collection of three books, each with its unique storyline and genre. Users can easily navigate through the bookstore and select a specific book of interest.

2. Dedicated Book Pages:

Upon clicking on a book, visitors are directed to dedicated pages providing in-depth information about the selected book. These pages include details such as the author, publication date, a brief synopsis, and any other relevant information.

3. Responsive Design:

The website is designed to be responsive, ensuring a seamless experience across various devices. Whether users access the site from a desktop, tablet, or smartphone, the layout and functionality remain consistent and accessible.

4. Stylish User Interface:

The user interface is crafted with a clean and stylish design, enhancing the overall aesthetic appeal of the website. CSS styling is utilized to create an engaging visual experience that complements the literary theme of the bookstore.

Technologies Used:

HTML:Used for structuring the content and creating the main components of the website.

CSS: Employed for styling elements and enhancing the visual presentation of the bookstore.

Future Enhancements:

Currently, the project focuses on the static representation of the bookstore. In the next phase, JavaScript will be implemented to introduce dynamic features, such as interactive book previews and additional user engagement elements.

MUSIC PAGE USING HTML AND CSS

Introduction:

Welcome to the "Music Page" project, a serene corner of the internet dedicated to providing you with soothing bedtime music to help you fall into a deep and natural sleep. This static website is crafted to be your go-to destination for tranquil melodies that create the perfect atmosphere for relaxation and rest.

Key Features:

1. Starting Page with a Captivating Message:

The journey begins on the starting page, where a beautifully crafted banner sets the tone for your experience. The page features a "Get Started" button, inviting you to embark on a musical voyage that leads to a night of peaceful slumber. Accompanying the button is a caption that encapsulates the essence of the project: "Soothing bedtime music to help you fall into a deep and natural sleep."

2. Playlists Page:

Clicking the "Get Started" button transports you to the heart of the project—a dedicated page filled with carefully curated playlists. Each playlist is thoughtfully compiled to create a serene ambiance, enhancing the bedtime experience. Whether you prefer gentle piano melodies, calming nature sounds, or other tranquil tunes, you'll find the perfect soundtrack for your nightly routine.

3. Simple Navigation:

Navigation is kept simple and user-friendly. The "Get Started" button serves as your entry point to the playlists, allowing you to effortlessly explore and discover the music that resonates with you.

Future Enhancements:

While the current version focuses on the simplicity of accessing curated playlists, future iterations may include features such as user-generated playlists, personalized recommendations, and additional content to enhance the overall bedtime music experience.

HTML Code:

EXPLORE YOUR FAVOURITE PLACES

Introduction:

Welcome to the "Favourite Places" project, a static website designed to take you on a visual journey to some of the most enchanting destinations on the planet. Our curated list includes iconic landmarks: the majestic Taj Mahal, the spiritual city of Varanasi, the grandeur of Mysore Palace, and the serene Golden Temple.

Key Features:

1. Banner with "Get Started" Button:

The first page welcomes you with a captivating banner showcasing glimpses of these extraordinary places. An inviting "Get Started" button beckons you to embark on this virtual adventure and explore the beauty and cultural richness of our favorite destinations.

2. Favorite Places Showcase:

Each destination has its dedicated section, offering a glimpse into its unique charm. From the intricate marble beauty of the Taj Mahal to the spiritual essence of Varanasi, the regal Mysore Palace, and the tranquil ambiance of the Golden Temple, each place is presented with stunning visuals and informative snippets.

3. Simple Navigation:

Navigation is kept straightforward, allowing users to easily switch between the different favorite places. Click on the "Get Started" button to begin your exploration or navigate directly to your preferred destination.

Technologies Used:

HTML: Utilized for structuring the content and creating the main components of the website.

CSS: Employed for styling elements and enhancing the visual presentation of the favorite places.

Future Enhancements:

While the current version focuses on providing a visual showcase, future iterations may incorporate additional features such as interactive maps, user-generated content, and more detailed information about each destination.

HTML Code:

```
<!DOCTYPE html>

    The Taj Mahal is considered to be the greatest architectural achievement
    in the whole range of Indo-Islamic architecture. Its recognised
    architectonic beauty has a rhythmic combination of solids and voids,
    concave and convex and light shadow; such as arches and domes further
    increases the aesthetic aspect. Not a piece of architecture, as other
    buildings are, but the proud passions of an emperor's love wrought in
    living stones.

Varanasi Temple

Sri Kashi Vishwanath Temple also known as the Golden Temple, it is dedicated to Lord Shiva, the presiding deity of the city. Varanasi is said to be the point at which the first jyotirlinga, the fiery pillar of light by which Shiva manifested his supremacy over other gods, broke through the Earth's crust and flared towards the heavens. More than the Gaths and even the Ganga, the Shivalinga installed in the temple remains the devotional focus of Varanasi.

Mysore Palace

Mysore Palace, also called Amba Vilas Palace, is one of the most magnificent and largest palaces in India. Situated in the southern state of Karnataka, it used to be the official residence of the Wodeyar Dynasty, the rulers of Mysore from 1399 to 1950. The grand palace stands tall in the heart of Mysore city and attracts visitors from across the world. Being one of the prime attractions in India after the Taj Mahal, it certainly deserves a place in every traveler's bucket list.

3.ADVANTAGES AND DISADVANTAGES

Advantages

- 1) It is quick to develop.
- 2) It is cheaper to develop.
- 3) It is easier to host.
- 4) It is ideal for small websites.
- 5) It is easier for search engines to index.
- 6) It is faster to transfer on slow connections.

Disadvantages

- 1) It may cost more for long run.
- 2) For any changes you'll need to wait until your web designer has time to make the changes.
- 3) Limited functionality
- 4) Website editors need significant training and skills to develop the web site to modern-day standards and practices. This is often time consuming, expensive and ongoing.

4. CONCLUSION

In the culmination of this documentation, we celebrate the creation of our static website — a digital canvas carefully crafted to deliver a unique and engaging experience. From the captivating starting page with its inviting "Get Started" button to the curated content that awaits within, our project aims to captivate and inspire.

Reflection:

Throughout this journey, we've combined thoughtful design elements, responsive layouts, and purposeful content to create an immersive environment. Our commitment to simplicity in navigation ensures that users can seamlessly explore and interact with the website across various devices.

Appreciation:

We extend our gratitude to everyone involved in bringing this vision to life. Whether you are a developer, designer, or a user discovering our website, your contribution and engagement are invaluable.

Looking Forward:

As we conclude this phase of the project, we look forward to the future. Our commitment to improvement and innovation remains steadfast. Your feedback is essential to us — let us know how we can enhance your experience further.
